

The ideal MARINE TV ANTENNA type 101U

Reception from all directions without turning

Reception of all channels 2-80

Den ideelle MARINE TV ANTENNE type 101U

Modtagelig fra alle retning.

Kan modtage alle kanaler 2-80.

Fremstillet af vejrbestandigt materiale.

Dimension: 630 x 630 x 260 mm

Vægt: 2,5 kg

Impedance: 70 oHm

Antennen skal placeres så højt som muligt på toppen af skibets mast.

Mastens diameter må max være 40 mm..

The ideal MARINE TV ANTENNA type 101U

Reception from all directions without turning.

Reception of all channels 2-80.

Manufactured of weather proof materials

Dimensions: 630 x 630 x 260 mm

Weight: 2,5 kg

Impedance: 70 oHm

To be placed as high as possible in the ship on top of a mast with diameter max. 40 mm.

Wide Band AMPLIFIER HF-101

To be used with Marine TV Antenna 101U

Frequency range: 40 to 860 MHz

Impedance: 75 oHm

Transducer gain: typical 22 dB

Flatness of frequency response: typical 1,0 dB

Output voltage: > 108 dBuV

Noise figure: typical 2 dB

D.C. supply voltage: =12-24V ±10%

Operation ambient temperature: -20 to +70 °C
